

let the revolution begin

Following a decade of research and two years of development, the AR group presents the most exciting and technologically advanced bowline of the twenty first century. AR's eye-seers bows dramatically reduced vibration and noise that travel through bow components. The bold detail and innovative design of AR's risers are more than aesthetically pleasing, they are functional. Each riser is strategically placed to direct vibrations away from the shooter's hand.

The precision machined AR-31, AR-34 and AR-37 are the most forgiving bows you will ever shoot!

AR-31

The AR-31 is designed to be the most forgiving short axle length, reflexed bow on the market today. This ultra-compact, lightweight, high-performance bow is ideal for pursuing any game, anywhere. The extreme let-off back limbs give the AR-31 a unique profile. The short axle-to-axle length and high brace height make this one of the most stable and maneuverable hunting bows on the planet.

- Axle-to-Axle: 31"
- Brace Height: 8-1/2"
- Let-Off: 70%
- Weight: 3.6 lbs.
- Speed: 301 fps
- Camo Finish: Mossy Oak® Break-Up™
- Cam: RAM Cam™
- Idler: 4" with Precision Bearings
- Draw Lengths/Weights: 26"-30" / 60-70#

AR-34

The AR-34's combination of speed, accuracy and whisper quiet performance positions it as one of the most desirable hunting bows in the market today. Shoot this bow and realize why the AR-34 has set the new benchmark by which all other bows will be measured!

- Axle-to-Axle: 34"
- Brace Height: 8"
- Let-Off: 70%
- Weight: 3.7 lbs.
- Speed: 309 fps
- Camo Finish: Mossy Oak® Break-Up™
- Cam: RAM Cam™
- Idler: 4" with Precision Bearings
- Draw Lengths/Weights: 26"-30" / 60-70#

AR-37

The AR-37's shorter brace height and more aggressive geometry establishes it as the fastest performer of the Archery Research family of bows. Optimized for archers on the competitive shooting circuit and bowhunting looking for speed and accuracy, the AR-37 stands in a class by itself.

- Axle-to-Axle: 37"
- Brace Height: 7"
- Let-Off: 70%
- Weight: 3.7 lbs.
- Speed: 312 fps
- Camo Finish: Mossy Oak® Break-Up™
- Cam: RAM Cam™
- Idler: 4" with Precision Bearings
- Draw Lengths/Weights: 26"-30" / 60-70#
